EDUCATION

UNIVERSITY OF CALIFORNIA, BERKELEY

Bachelor of Art, 2017 – present
Cognitive Science

LAS LOMAS HIGH SCHOOL

2013 – 2017

SKILLS

HTML5	React
CSS3	Photoshop
JS / ES6	Illustrator
Java	
Python	

PROJECTS

NONADOX

I created this ios puzzle game that incorporated an original concept and design. This tested my creative abilities, as the music, art and coding were all produced alone. This was built using swift and Spritekit. The art was created using illustrator and photoshop.

SCHMOOZE

I was the product designer for a social app called Schmooze. I designed concepts for the user interface and experience, and created promotional material.

BELLO COFFEE

I created the website www.bello.coffee and designed their menu board. I am currently reworking the website to incorporate an online store to expand their business.

HEXAFLUX

This was an ios game that was created collaboratively. I designed the app interface and graphics.
